StorageCraft®
Cloud Backup
For G Suite

Protect All Your Critical G Suite Data.
Part of the Robust StorageCraft Recovery Solution™.

BACKUP   MANAGE   REPLICATE   RECOVER   PHYSICAL   VIRTUAL   CLOUD

Introduction

Organizations understand that they need to protect their most important asset, their data. In today's world data resides everywhere. While it continues to reside in organizations' physical and virtual servers, today more and more critical organizational data resides only in the cloud. This important cloud-based data needs to be protected and available just the same as data stored in more conventional places. G Suite® by Google Cloud provides advantages to organizations of all sizes and it demands the same high level data backup and recovery solutions as other traditional on premise applications.

The Need

Since SaaS applications are built for the cloud many organizations and individuals believe that their valuable data is automatically protected and available. Cloud-based application vendors do provide a basic level of protection, but their backups are designed to meet their platform requirements and not those of end users. Customer data must be:

- Safe from the most common cause of data loss, user errors
- Recoverable from data loss due to system errors
- Available longer than a short 30-day window
- Protected against internal and external threats
- Available quickly when needed in the proper format

SaaS application users need to make sure that they have these additional levels of protection and accessibility in order to meet basic organizational needs.

The Solution

To meet this critical need for cloud-based protection, StorageCraft® Cloud Backup™ for G Suite® provides a flexible, easy-to-use solution for the protection, management and recovery of G Suite data. It is protected, encrypted and made available through an intuitive, web-based interface. Users can quickly recover a file, a folder, or an entire user account quickly and easily in its original format.

The Coverage

StorageCraft Cloud Backup for G Suite provides protection for:

- **Gmail**
- **Google Calendars and Contacts**
- **Google Drive**
- **Public Shared Folders**

Cross Service Search and Restore

StorageCraft Cloud Backup allows searching across both included services, Office 365 and G Suite.

Features and Benefits

Feature	Benefit
Accessibility	Service is available through any Internet-connected device
Protection of Backup Data	Data is protected by state-of-the-art compression, encryption in SAS 70-certified centers
Efficiency & Reliability	Users can restore a document, a folder, or all content without deleting or overwriting files
Fast Recovery	Needed files or folders can be identified, restored and downloaded immediately
User Transparency	Data additions or changes are identified automatically and backed up without user intervention
Ease of Use	All backup and recovery controls are menu-driven, intuitive, and complete
Best Use of Resources	Lower IT costs: no hardware overhead, no worries about updates
Flexibility & Scalability	Easy to adjust to the changing demands of systems or users
