

Why businesses need to backup Microsoft 365

The adoption & migration to public cloud services and SaaS apps is increasing at an exponential rate, along with data growth. While Cloud adoption comes with some great benefits, there is still a requirement to provide protection for your corporate data in these high availability platforms

Reasons

- User accidentally deletes data
- User over-writes data with 'Save'
- Hacker or external party deletes/encrypts data
- SaaS Service ends or licencing error
- Malicious internal deletion of data
- Application error

Our Microsoft cloud backup is compatible with all plans and included automated Microsoft 365 Email, OneDrive, SharePoint Online, Teams, Calendar, Contacts and Tasks recovery. New users are automatically added to the backup to ensure you always have coverage,

Key Product Functionality

- Complete protection for your Microsoft 365 suite
- Supported Applications
 - Exchange Online
 - OneDrive
 - SharePoint Online
 - Teams/Groups
- Automated and on-demand backups
- All data is encrypted in 256-bit and secure
- Free restoration back into Microsoft 365
- Configurable retention policy
- Options for simple non-destructive restoration

Microsoft

"Point in time restoration of mailbox items is out of the scope of the Exchange service"
